Sent by fax to 262-5069 and by U S Mail

Dear Mr. and Mrs. Thomas:

As discussed with you yesterday, it has come to the attention of Wright/Garff Resources, LLC (hereafter W/G) that you (i.e., your employees) are moving boulders and other mined material belonging to W/G on Lot 38 in Browns Canyon. This letter is to confirm and demand in writing that neither Star Stone Quarries, Thomas American Stone and Building, et al., (hereafter American) nor any other entity is to do anything with those boulders and other material. The Third District Court in January, 1997 decreed and ordered that American did not then or any time previous own the stone on Lot 38, whether in the ground, extracted from the ground or sitting on the ground. During the lease term the stone became American's when it left Lot 38 and at that point a royalty became due to W/G for the removed stone. That lease ended on October 31, 2005 along with any right of American to tamper with or remove W/G's stone.

The rights and ownership regarding Lot 38 surface and subsurface were further clarified by decision of the Utah Board of Oil Gas and Mining. They explicitly ordered that you were not to touch the mine face or do any more damage thereto than you had already done in the name of "reclamation".

You do not have a Summit County permit to mine or move our product or any other material. It is not to be used for your so-called "reclamation". We will immediately request Summit County to issue a Stop Work Order. Cease and desist immediately or face further consequences. Govern yourself accordingly.

Sincerely,

Edward B. Rogers, Manager
